

Words and Music: Primeggia

Say That You Will

A=3 B=7 Distortion moderate

Am **F**

I'm trying to make you see
Just how much you mean to me
Stop making alibi's
I can tell by the look in your eyes
I wanna be the one who makes you scream for more
I wanna walk right in through your bedroom door
Come on what you say
Am I gonna have it my own way

G **F**

Say that you will
Say that you will
Say that you will

Try to think it through
Don't you feel it too
Why can't you say
That you like me in that way
I write songs filled with love on my baby grand
All you do is stick your head right in the sand
Look in my face
Won't you give me your embrace

Say that you will
Say that you will
Say that you will

I invite you to the show
You keep telling me you just don't know
I call you on the phone
Just wanna spend some time alone
You say no, I say why I'll keep my cool
I think you're afraid of what you might do to me
Your mouth might still say no
But your deeds say to me that you want me so

Say that you will
Say that you will
Say that you will
