

Words and Music: Primeggia

Seasons (A jam in Gm)

The warmth of the sun tells us summer's here
It's the time of love with you my dear
Take a break my the grind
Grab some fun and leave your cares behind

SHORT LEAD

In autumn all the leaves begin to change
The time is right for our lives to rearrange
The air is crisp and the sky is clear
Gazing at the stars asking why are we here

SHORT LEAD

Winter comes on so strong
The days are short and the nights are so cold and long
Introspection takes the stage
We contemplate what it means to age

LONGER LEAD

Spring arrives as a time to renew
All that matters is the love between me and you
All the flowers start to bloom
Our hearts increase taking up more room

Seasons fade and summers die
We persevere and we try, try, try
In the end we give and we take
Try to build strong bonds that will not break
